Mobile: +91 8447107589

Summary

- With 2.7 years of experience in Analysis, Design, Implementation and Debugging of application software using Eclipse, Spring MVC, Hibernate, MySQL.
- Expertise in Core Java and MySQL.
- Hands on experience in Database Design, Maintenance in adherence to Performance.
- Hands on Experience in Database concepts like SQL querying, Procedures, views etc
- Sound knowledge on Object Oriented Programming Concepts (OOP), Data Structures and SDLC.
- Extensive troubleshooting and bug solving skills.
- Excellent team player, with skills in troubleshooting, problem solving, oral and written communication.

Technical Skills

Programming Languages	Java
Framework	Hibernate, Spring MVC
RDBMS	MySQL
Tools	Eclipse
Web Services	REST

Professional Experience

Cognizant	Bangalore	01/22/2016 - Present (Work Experience)
-----------	-----------	--

Projects Undertaken:

Project 1:

Project Name: MyPhilips Portal

Role: Back End Developer, Enhancements

Period: June 2016 – December 2017

Technology Used: Spring MVC, Spring AOP, Java, MySQL, Hibernate

Responsible For:

- Handling the project completely.
- Developing and maintaining a suite of products developed in Java, spring to streamline and automate the functionalities within the Account.

- Developing mailers.
- Bug Fixing

Description: About 1000 people on an average to maintain the regular activities compliant and adhere to the system use the Web Portal. This web application is used to perform Onboarding, Offboarding etc. Based on the allocation report, only allocated people can access the website.

Project 2:

Project Name: Daily Mailer Trigger

Role: Developer, Enhancements

Period: June 2016 – December 2017

Technology Used: Java, Hibernate, MySQL

Responsible For:

Based on certain scenario, every day automated mailers are triggered. These mailers are scheduled in Task Scheduler. Some common mailers are **Onboarding Mailer, Allocation End Mailer, and Access Provide Mailer etc.**

Project 3:

Project Name: Label Print System (LPS)

Role: Data Migration Analyst

Period: March 2017 – Present

Technology Used: MS Access

Responsible For:

- Migrating data from two servers to another server.
- Merging of two databases in another database.
- Modifying scripts. For merging database, I did some changes to the script. Initially with the help of scripts, data was getting inserted into two different databases which I changed to single database.
- Creating a weekly clean up job. Once in a week, a file will be sent by regular sources which contain the order numbers that are not required. A job will run and it will delete all the not required order numbers.
- Performing IQ testing. The purpose of IQ testing is that it verifies the system's hardware, software, and data is installed and configured correctly, and conforms to specifications. This includes the installation of the application configuration, as well as any, customizations, and interfaces being implemented. Based on IQ document, I performed all the tasks and completed testing successfully.
- Migrating of all physical file which consists of logs, scripts, document etc.

Description: In LPS, a job will run in every 15 minutes. In every 15 minutes, we will receive order numbers. Based on those order numbers, users will be able to print label. It is a Migration Project where

data has to be migrated from two server to another server. Merging of databases from two different servers to another server is also involved.

Educational Qualification

Qualification	Specialization	Percentage	Year of Passing
B.Tech	ECE	75%	2015
12th	Physics,Chemistry,Mathematics	81%	2010
10th	Science,Mathematics	77%	2008

Trainings

C#, Asp.net, Java, SQL Server – CTS Chennai
